A DEVICE FOR INJECTING AN INTRAOCULAR LENS MADE OF FLEXIBLE MATERIAL

5

The present invention provides a device for injecting an intraocular lens, the device comprising a syringe body (1) having a piston (2) mounted therein. According to the invention, the body (1) constitutes a single piece and comprises a cylindrical portion (3) capable of containing the lens (4) in a non-deformed state, an injection endpiece (6), and a conical intermediate portion (5), and it has no cylindrical opening or auxiliary system (such as a cartridge, a flap, a slide, a removable endpiece, ...) for loading said lens.
